Professional Skills

Work Experience

Full stack developer at Boost Internet

Nov, 2022 - January, 2024

- Main tasks given to me it was just to look over the websites if there's problem then i should have fix them
- Designed many types of databases such as MySQL/PostgreSQL
- Built many modules for laravel and have had written tons of scripts from the scratch for the marketplaces
- Built many front-end stuff in react.js/next.js
- Coded many console applications in c++ for the company
- Some pieces were written in Python

Backend developer at Taiguli

May, 2022 - Sep, 2022

Taiguli as a company is selling the flowers so as a developer and contractor i was given a job to remake entire script and remodel things and remove errors and fix them .

Used technologies: PHP/Laravel/MySQL/JS/CSS

Web developer at Maxima

Dec, 2020 - Nov, 2021

- As an administrator main tasks given to me were the following things: "To create modules for wordpress" also "creating front-end stuff from the scratch", "working with the database (mysql/postgres/sqlite)" and working with javascript and php as it was the main language which we were using for the compan
- Working with Mysql Database and sometimes with sqlite also
- Coded many modules for laravel
- Built many front-end stuff in react.js/jquery and vanilla js
- Some rest-api's were written in flask(Python)

Web developer at Alibuss

October, 2019 - Sep, 2020

- Coding new scripts for the marketplace in PHP
- Working with Mysql Database and sometimes with sqlite also
- Coded many modules for laravel
- Built many front-end stuff in react.js/jquery and vanilla js
- Python was used also but neither for back nor for front in it we have coded some scripts for the company itself

Full stack dveloper at Geowent

June, 2018 - Sep, 2019

GEOWENT (LLC) was serving every new-comer tourist in the case if they wanted to rent some taxi-drivers to deliver them whenever and wherever they wish or want . The company geowent was created by me and my companions so i can say that company belonged to me and as a developer and company founder i did create entire website plus android app for taxi-drivers who were working for us.

Used technologies: Python/Flask/PHP/MySQL/Java/Apache Cordova

Freelancing at (Fiver and Peoplehour)

January, 2016 - May, 2018

As an every web developer and freelancer mainly i was creating and modifying scripts or just creating websites from the scratch in the following languages (Javascript/PHP/SQL/UI/Python) ...
